

# MOLDAX MOS2 XxTRA

**EXTREME PRESSURE LITHIUM GREASE FOR BEARINGS**

## Description

Rymax Moldax MoS2 Xxtra is formulated to lubricate heavy loaded bearings, joints and other mechanisms. It is special grease for construction and mining machinery and for the steel, paper and cement industry. The combination of EP additives and solid lubricants improves the lubrication capacity under heavy loads and the Anti-Wear properties.

## Typical Properties

Appearance		Grey black
NLGI consistency		2
Thickener		Lithium
Base Oil		Mineral
Worked penetration	25°C	265-295
Drop Point	°C	>180
4-ball wear test, weld load	kg	350
EMCOR rust test		0.0
Oil Separation	18h/40°C/%	2
Oxidation stability	100°C, bar	0.6
Copper Corrosion	24h/100°C	1b
Water wash out	40°C,%	4
Water resistance	3h/90°C	0
Working Temperature	°C	-25/130

## Benefits

- Very good resistance to mechanics
- Water resistant
- Anti rust capacity
- Resistance to the heaviest loads
- High anti wear capacity
- Chemical stability
- Resistance to oxidation
- Long life
